

# DJI TERRA

## MAKE THE WORLD YOUR DIGITAL ASSET

Capture, analyze and visualize your environment with DJI Terra – an easy to use mapping software developed to help industry professionals transform real-world scenarios into digital assets.

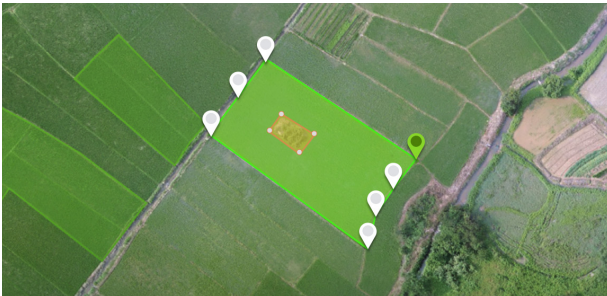

### EFFORTLESS MAPPING WITH FLEXIBILITY

DJI Terra allows users to add waypoints to draw a polygon as target areas and flexibly adjust flight paths as desired, plan a mission and set desired flight parameters to cover the needs.

### FAST IMAGERY ACQUISITION

DJI Terra collects imagery of target areas and stitches them into actionable maps in real-time.

### SIMPLIFIED WORKFLOW FOR EASY PLANNING

Marking of boundaries, obstacles, calibration points are all done on the DJI Terra interface.

### PRECISION AT WORK WITH PHANTOM 4 RTK

Works with Phantom 4 RTK with its RTK precision positioning, 1-inch CMOS sensor, and DJI's signature OcuSync 2.0 HD transmission technology.
